

**GAINSWave® Clinical Training to be Provided by
REVIVE™ Advanced Training Consultants**

Newport Beach, California—REVIVE™ Advanced Training Consultants, providers of specialized Continuing Medical Education (CME) programs for physicians, is pleased to announce its new partnership with GAINSWave®, a highly-regarded treatment for erectile dysfunction (ED).

Through this partnership, REVIVE™ will provide both didactic and hands-on clinical training for extracorporeal shockwave therapy (ESWT) and PRP injections.

One in 10 men worldwide suffer from erectile dysfunction, and over 80% of ED issues are caused by poor blood flow. The GAINSWave® treatment is a groundbreaking therapy that works by addressing and reversing ED's root cause.

Performed in-office, the non-invasive, drug-free, surgery-free combination therapy treatments are based on the use of high frequency, low-intensity sound waves (also known as extracorporeal shockwave therapy) and the addition of PRP injections. ESWT is a safe, comfortable treatment that improves blood flow to the penis, removes micro-plaque, stimulates the growth of new blood vessels and activates the growth of new nerve tissue. The results after a course of treatments typically last for two to three years.

REVIVE™ will offer urologists and other physicians expert training on the proper protocols for providing the GAINSWave® treatment and also the PRP protocol familiarly known as the P-Shot®. These courses will teach physicians how to use these protocols and will certify them for marketing memberships with both GAINSWave® and P-Shot™.

All aspects of these courses will be presented by board certified physicians who have been successful in providing these services.

The online didactic/demo training course will be presented via live webinars and also pre-recorded webinars that can be accessed at any time on REVIVE's website, www.revivetrainings.com. Hands-on CME workshops will be presented in Northern and Southern California, Arizona, Illinois, New York and Texas, with the first workshop taking place in Los Angeles on January 12, 2019. While it is recommended that participants who are new to these treatment protocols take advantage of both training opportunities, the webinar will qualify participants for membership in GAINSWave's® marketing provider network and also the P-Shot® marketing provider network.

“We are excited about the synergies that these partnerships provide,” says Mark White, CEO of GAINSWave®. “Knowing that physicians can receive excellent training through REVIVE™ will enable us to focus our energies on publicizing the availability of the GAINSWave® treatment and supporting our provider network.”

“This partnership is not only a win/win for our organizations,” adds, Kim Winebrenner, CEO of REVIVE™ Advanced Training Consultants, “it is also immensely beneficial for physicians who want to be able to offer an affordable non-palliative treatment that has had excellent results restoring long-term natural erectile function for those who suffer from ED due to poor blood flow. As with all REVIVE™ trainings, the courses offered through our male sexual wellness training division are convenient, affordable, board certified physician-led and CME certified.”

About REVIVE™ Advanced Training Consultants

REVIVE™ Advanced Training Consultants specializes in providing physician training on advanced PRP (platelet-rich plasma) and other tried-and-true bio-restorative treatment protocols. All courses are presented by board-certified faculty and provide participants with CME credit.

REVIVE's affordable course options include webinar-based certifications as well as live hands-on symposia. The company takes pride in providing expertise and real world experience to ensure participants' success in building robust practices that utilize bio-restorative medicine.
