

Press Release

REVIVE™ Expert Physician to Lead Clinical Training for GAINSWave®

Newport Beach, California | December 11, 2019 – REVIVE™ Advanced Training Consultants, providers of specialized Continuing Medical Education (CME) programs for physicians, is pleased to announce its new partnership with GAINSWave®, the company that created awareness of an innovative and natural treatment for erectile dysfunction (ED).

Through this partnership, REVIVE™ will provide both didactic and hands-on clinical training for extracorporeal shockwave therapy (ESWT) and Platelet Rich Plasma (PRP) injections.

A majority of men over 50 suffer from erectile dysfunction caused by poor blood flow in the pelvis. GAINSWave® is a groundbreaking therapy that works by stimulating the growth of blood vessels thus reversing the cause of ED. “GAINSWave is the most exciting new development in the treatment of ED since Viagra.” according to California Bay Area Urologist Dr. Judson Brandeis. “There is a tremendous benefit to most patients with no medical side effects.”

The non-invasive, drug-free, surgery-free combination therapy treatments are performed in the office. GAINSWave® uses high frequency, low-intensity sound waves (also known as extracorporeal shockwave therapy) and the addition of PRP injections to create neo-angiogenesis. ESWT is a safe, comfortable treatment that improves blood flow to the penis by removing micro-plaque and stimulating the growth of new blood vessels. It can also potentially activate the growth of new nerve tissue. The clinical improvement after a course of treatments typically last for one to three years.

REVIVE™ will offer urologists, physicians and other health care providers expert training on the proper protocols for providing the GAINSWave® treatment and the PRP protocol also known as The P-Shot®. These courses will teach physicians how to use these protocols and will certify them for marketing memberships with both GAINSWave® and P-Shot®.

All aspects of these courses will be presented by board certified physicians who are experienced and successful in providing these services.

The online didactic/demo training course will be presented both by live webinars and pre-recorded webinars that can be accessed at any time on REVIVE’s website, www.revivetrainings.com. Hands-on CME workshops will be presented in Northern and Southern California, Arizona, Texas and Florida with the first workshop taking place in Los Angeles, Ca on January 12, 2019. While it is required that participants who are new to

these treatment protocols take advantage of both the webinar and hands-on training opportunities, the webinar will qualify experienced providers for membership in the GAINSWave's® marketing provider network.

“We are excited about the synergies that this partnership provides.” says Kim Winebrenner, CEO of REVIVE™ Advanced Training Consultants. “It is also immensely beneficial for physicians who want to be able to offer an affordable non-palliative treatment that has had excellent results restoring long-term natural erectile function. As with all REVIVE™ trainings, the courses offered through our male sexual wellness division are convenient, affordable, board certified faculty-led and CME certified.”
